PROFESSIONAL SUMMARY

AI-Native Full-Stack Engineer and Product Builder with a Bachelor's degree in Business Information Technology (BIT) and proven experience designing, developing, and deploying production-grade business platforms.

Specialized in building AI-powered applications, scalable SaaS systems, business automation workflows, API integrations, and data-driven solutions. Experienced in managing the complete software development lifecycle—from product discovery and system architecture to implementation, deployment, and optimization.

Built and shipped commercial platforms serving real businesses, including e-commerce systems, merchant enablement solutions, intelligent search experiences, AI-powered customer interactions, and enterprise management systems.

Passionate about AI Agents, Business Automation, Developer Platforms, SaaS Infrastructure, Integrations, and leveraging AI-assisted development workflows to accelerate product delivery and innovation.

CORE TECHNICAL EXPERTISE

Full-Stack Development

- Node.js
- Express.js
- React.js
- JavaScript (ES6+)
- TypeScript
- HTML5
- CSS3
- Bootstrap

Backend & Integrations

- REST API Design
- API Integrations
- OAuth 2.0
- Webhooks

- Authentication & Authorization
- System Integration

Databases & Data Systems

- PostgreSQL
- MySQL
- SQL Server
- Database Architecture
- Data Modeling
- Query Optimization
- Reporting & Analytics

AI & Automation

- OpenAI API Integration
- AI-Powered Search Systems
- Conversational AI
- Prompt Engineering
- Workflow Automation
- AI-Assisted Development
- Arabic NLP
- Sentiment Analysis
- Text Classification

Mobile Development

- Flutter
- Dart
- Firebase

Architecture & Product Development

- SaaS Architecture
- Multi-Tenant Systems
- System Design
- SDLC Management
- Business Process Automation

Tools & Collaboration

- Git
- GitHub
- VS Code
- npm
- Agile/Scrum
- CI/CD Principles

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Engineer & Product Builder

Self-Employed | Remote
May 2023 – Present

- Designed, developed, and deployed production-ready commercial platforms serving real businesses across e-commerce and merchant enablement sectors.
- Managed the complete software development lifecycle independently, from requirements gathering and system architecture to deployment and maintenance.
- Built scalable backend infrastructures using Node.js, Express.js, PostgreSQL, and REST APIs.
- Developed advanced administration systems for inventory management, customer operations, analytics, and business workflows.
- Integrated multiple third-party APIs and automation services.
- Implemented AI-powered features including intelligent product search, conversational interfaces, and workflow enhancements.
- Designed scalable database architectures optimized for maintainability and operational reliability.
- Leveraged AI-assisted development workflows to accelerate feature delivery and product development.

Key Achievements

- Successfully shipped multiple production-grade commercial platforms.
- Developed AI-powered multilingual product search capabilities.
- Reduced operational workload through automation and centralized management systems.
- Built scalable systems serving real business clients.

Technical Support Specialist Intern

Spark Tech
Jan 2025 – Mar 2025

- Provided technical support and troubleshooting for enterprise systems.
- Collaborated with engineering teams to identify and resolve software issues.
- Participated in system performance optimization initiatives.
- Created technical documentation and contributed to internal knowledge resources.
- Assisted in improving operational efficiency and service reliability.

Accountant

Al-Ariki Company
Mar 2022 – Apr 2023

- Managed bookkeeping, auditing, and financial reporting activities.
- Developed Excel-based automation tools and reporting systems.
- Reduced manual reporting efforts through process optimization.
- Applied analytical and data-driven decision-making techniques to financial operations.

FEATURED PROJECTS

Tamkin 360 — AI-Powered Merchant Enablement Platform

Tech Stack: Node.js, React.js, PostgreSQL, REST APIs, AI Integration

Building an AI-powered merchant enablement ecosystem that helps businesses establish, grow, and scale through technology, automation, branding, and intelligent digital solutions.

Core Features

- AI Business Assistant
- Merchant Dashboard
- CRM Workflows
- Service Marketplace
- Customer Support Automation
- Growth Analytics
- AI-Powered User Interactions

Responsibilities

- Product Design
 - System Architecture
 - Backend Development
 - Frontend Development
 - Database Design
-

G Shop — AI-Powered Commerce Platform

Tech Stack: Node.js, React.js, PostgreSQL, REST APIs

Production-ready e-commerce platform designed and deployed for real customers.

Highlights

- Intelligent Product Discovery
- AI-Powered Search
- Multilingual Search Experience
- Custom CMS
- Inventory Management
- Analytics Dashboard
- Marketing Integrations

Website:

<https://gshopquick.com>

Yahala Al Shamel — Commercial E-Commerce Platform

Tech Stack: Node.js, React.js, PostgreSQL

Developed a complete commercial platform including product management, customer operations, reporting systems, and digital marketing integrations.

Website:

<http://yahallastore.com>

Hotel Reservation Management System

Tech Stack: C#, SQL Server

Developed a hotel operations management solution supporting:

- Reservation Management
 - Room Allocation
 - Customer Records
 - Administrative Workflows
 - Secure Data Operations
-

Arabic Social Media Sentiment Analysis Platform

Tech Stack: Python, NLP, Machine Learning

Built an Arabic-language sentiment analysis platform capable of processing and classifying large volumes of social media content.

Features

- Arabic Text Processing
 - Sentiment Classification
 - Opinion Mining
 - Brand Monitoring Support
 - NLP-Based Analytics
-

AI PROJECTS & EXPERIMENTS

AI Product Search Engine

Developed intelligent search functionality enabling users to discover products through natural language queries, multilingual inputs, and local dialect expressions.

AI Customer Assistant

Implemented conversational AI experiences to assist customers and merchants through intelligent chat interfaces and automated interactions.

Arabic NLP Research

Explored machine learning and natural language processing techniques for Arabic text understanding, sentiment analysis, and classification.

BUILDER ACHIEVEMENTS

- Independently shipped multiple production-ready commercial platforms.
 - Managed complete product lifecycles from concept to deployment.
 - Built AI-powered features integrated into real-world business systems.
 - Worked across engineering, databases, integrations, analytics, and deployment.
 - Leveraged AI-assisted development workflows to accelerate product delivery.
 - Designed scalable business systems with strong focus on operational impact.
-

EDUCATION

Bachelor of Business Information Technology (BIT)

International University of Technology Twintech
Sana'a, Yemen

2021 – 2025

CERTIFICATIONS & TRAINING

- IBM Professional Certificate in Data Science
 - Comprehensive AI Camp – AI Approach Company
 - Oracle SQL & Database Management
 - C# Programming Coursework
 - Full-Stack Web Development Bootcamp
 - Cybersecurity & Mobile Security
 - Digital Marketing
 - Start and Improve Your Business (SIYB) – ILO
 - Entrepreneurship Program – ESCWA
 - Road to Entrepreneurship – Injaz Yemen
-

LANGUAGES

Arabic — Native

English — Professional Working Proficiency (B2)

PROFESSIONAL STRENGTHS

- Product Thinking
- Systems Architecture
- AI-Assisted Development
- Business Process Analysis
- Problem Solving
- Technical Documentation
- Cross-Functional Collaboration
- Agile Development
- Adaptability
- Data-Driven Decision Making
- Continuous Learning
