

AYMAN NAJIB AL-AREQI

AI-Native Full-Stack Engineer | Product Builder | Systems Architect
ay.alareqi@gmail.com | +967 771 485 152 | Sana'a, Yemen | Open to Remote Worldwide
Portfolio: ayman-najib.github.io/ayman-portfolio | GitHub: github.com/Ayman-Najib

PROFESSIONAL SUMMARY

AI-Native Full-Stack Engineer and Product Builder with a Bachelor's degree in Business Information Technology and proven experience designing, developing, and deploying production-grade commercial platforms. Specializes in scalable SaaS architecture, AI-powered application development, REST API engineering, and end-to-end product ownership. Independently shipped multiple live business platforms across e-commerce and merchant enablement—architecting backend systems, database schemas, React.js frontends, and OpenAI integrations from concept through production deployment. Combines deep technical execution with product thinking and business acumen to build software that drives measurable operational impact. Proficient in AI-assisted development workflows, automation engineering, and modern full-stack tooling.

CORE COMPETENCIES

Full-Stack Development • SaaS Architecture • AI Integration & Prompt Engineering • REST API Design • Backend Engineering • Database Architecture • Multi-Tenant Systems • Product Development • Business Process Automation • AI-Assisted Development • E-Commerce Platform Engineering • End-to-End Product Ownership • Performance Optimization • SDLC Management

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python, Dart, C#, SQL

Frontend Technologies: React.js, HTML5, CSS3, Bootstrap, Responsive Web Design

Backend Technologies: Node.js, Express.js, REST API Design, OAuth 2.0, JWT Authentication, Webhooks

Databases: PostgreSQL, MySQL, SQL Server, Database Architecture, Data Modeling, Query Optimization

AI & Machine Learning: OpenAI API, AI-Powered Search, Conversational AI, Prompt Engineering, Arabic NLP, Sentiment Analysis

Mobile Development: Flutter, Dart, Firebase

Cloud & Infrastructure: Firebase, CI/CD Principles, Git, GitHub, Deployment & Hosting

Architecture & Product: SaaS Architecture, Multi-Tenant Systems, System Design, SDLC Management, Business Process Automation

Tools & Collaboration: Git, GitHub, VS Code, npm, Agile/Scrum, Technical Documentation

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Engineer & Product Builder | Self-Employed | Remote | May 2023 – Present

- Designed, architected, and independently deployed multiple production-grade commercial platforms across e-commerce and merchant enablement verticals, owning the complete SDLC from requirements gathering through post-launch iteration.
- Engineered scalable backend systems using Node.js, Express.js, and PostgreSQL, implementing RESTful API architectures that power complex inventory workflows, customer operations, and business analytics.
- Integrated OpenAI API to deliver AI-powered product search and conversational interfaces, enabling natural language and multilingual queries across Arabic and English inputs to improve product discoverability.
- Built comprehensive administration systems encompassing CRM workflows, inventory management, automated analytics dashboards, and third-party API integrations including payment gateways and marketing platforms.
- Designed multi-tenant database architectures optimized for data integrity, query performance, and long-term operational scalability across multiple live client deployments.
- Accelerated development velocity through strategic adoption of AI-assisted development workflows, automated scaffolding, and modern engineering tooling.

Technical Support Specialist — Intern | Spark Tech | Jan 2025 – Mar 2025

- Delivered technical support and troubleshooting for enterprise software systems, collaborating with engineering teams to diagnose and resolve software defects, reducing ticket resolution time.

- Contributed to system performance optimization initiatives that improved service reliability and operational efficiency across monitored systems.
- Authored technical documentation and internal knowledge base articles to standardize support procedures and improve cross-team efficiency.

Accountant | Al-Ariki Company | Mar 2022 – Apr 2023

- Managed end-to-end bookkeeping, auditing, and financial reporting operations, ensuring accuracy and compliance across all financial activities.
- Designed Excel-based automation tools and dynamic reporting dashboards, reducing manual processing effort and accelerating monthly close cycles.
- Applied data-driven analysis to optimize financial decision-making and surface actionable business insights for management.

SELECTED PROJECTS

Tamkin 360 — AI-Powered Merchant Enablement Platform | *In Active Development*

Tech Stack: *Node.js, React.js, PostgreSQL, OpenAI API, REST APIs*

- Architecting a multi-service SaaS ecosystem enabling businesses to establish, grow, and scale via an AI Business Assistant, Merchant Dashboard, CRM automation workflows, Service Marketplace, and Growth Analytics engine.
- Implemented AI-powered interaction workflows using OpenAI API, delivering personalized merchant support, automated customer engagement, and intelligent task orchestration within a unified platform.
- Owning full product lifecycle: product strategy, system architecture, backend API engineering, React.js frontend, and multi-tenant PostgreSQL database schema design.

G Shop — AI-Powered E-Commerce Platform | *Live Production* | *gshopquick.com*

Tech Stack: *Node.js, React.js, PostgreSQL, OpenAI API, REST APIs*

- Built an AI-powered intelligent product search engine supporting natural language, multilingual, and Arabic dialect queries, significantly improving product discoverability for real customers.
- Engineered a custom CMS, inventory management system, analytics dashboard, and marketing integration layer, delivering a complete scalable commerce infrastructure from first line of code to live deployment.

Yahala AI Shamel — Commercial E-Commerce Platform | *Live Production* | *yahallastore.com*

Tech Stack: *Node.js, React.js, PostgreSQL*

- Engineered a full commercial platform covering product catalog management, customer operations, digital marketing integrations, and reporting workflows serving active business users.

Arabic Social Media Sentiment Analysis Platform | *Completed*

Tech Stack: *Python, NLP, Machine Learning*

- Developed an Arabic-language NLP platform for processing and classifying large volumes of social media content, enabling sentiment analysis, opinion mining, and brand monitoring capabilities.

Hotel Reservation Management System | *Completed*

Tech Stack: *C#, SQL Server*

- Built a full hotel operations management system covering reservation management, room allocation, customer records, and administrative workflow automation with secure data access controls.

EDUCATION

Bachelor of Business Information Technology (BIT)

International University of Technology Twintech | Sana'a, Yemen | 2021 – 2025

CERTIFICATIONS

- IBM Professional Certificate in Data Science
- Comprehensive AI Camp — AI Approach Company
- Oracle SQL & Database Management
- Full-Stack Web Development Bootcamp | Cybersecurity & Mobile Security
- Start and Improve Your Business (SIYB) — ILO | Entrepreneurship Program — ESCWA | Road to Entrepreneurship — Injaz Yemen

LANGUAGES

Arabic: Native | English: Professional Working Proficiency (B2)

ADDITIONAL INFORMATION

Available for remote work globally. Actively developing AI-powered SaaS products. Experienced across the full engineering stack—backend, frontend, database, cloud deployment, and AI integrations. Strong interest in AI Agents, Developer Platforms, SaaS Infrastructure, and Business Process Automation.
